

Paddock Slabs

Paddock Slabs

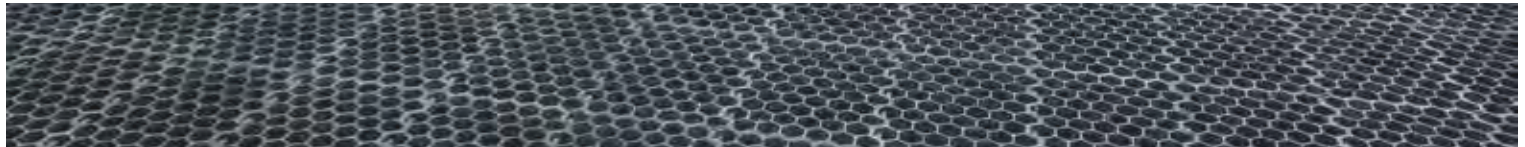

- Permeable design
- Erosion Prevention
- Environmental friendly
- Stable Interlocking design

This multi-purpose porous tile has a wide range of uses for a wide range of industries. The grid's three most significant features are its permeability, its load bearing strength, and its ability to lock fast with other tiles to create a smooth, continuous, erosion resistant grid. While the manufacturer refers to this product as a Paddock Slab, its functionality is certainly not limited to the paddock.

- Item № 1336
 Coverage:
 • 2.11 ft²/tile
 • 0.1957 m²/tile

Made in Germany, Engineered for SLW 60, 60t load (heavy goods vehicle).
